

MARSTON

OPTOMETRY

Dearest Patients,

Based on the latest COVID-19 updates, the CDC strongly recommends Doctors of Optometry postpone routine eyecare visits, while prioritizing urgent and emergency visits/procedures to ensure patient and staff safety.

With that in mind we will be implementing a reduced/as needed schedule through April 12th. We will re-evaluate as we near that date. Our phones will be open during our limited office times, but you can leave a message or email us if we aren't available. We will do our best to help with all your needs. There will also be the option to do a telehealth visit through Skype or FaceTime with one of our doctors should you not be able to venture from home. We will keep an as needed appointment only schedule as follows:

Mondays: 11-3

Tuesdays: 11-3

Wednesdays: closed

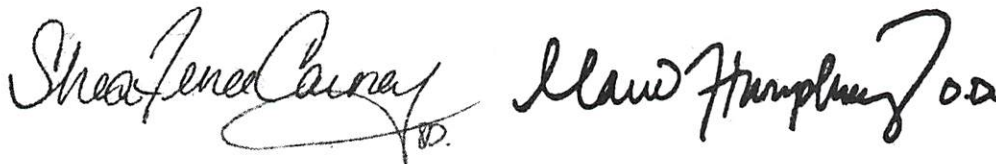

Thursdays: 11-3

Fridays: closed

During those times we will be available for emergency visits, picking up glasses or contacts (we have options to ship them to you, or pick up at the door), glasses repair, urgent examinations or what is deemed necessary by our doctors.

Our same criteria apply for any patient that comes into the office. Should you have any symptoms (as listed prior), be around anybody who has symptoms, have traveled within the last 30 days you may not be allowed to enter.

We appreciate your understanding during this interesting time. As a small business and health care provider we cannot do it without your support. As always, we appreciate you all as our loyal patient base. We hope you stay safe and healthy!

Shea Ferree Carney, O.D.

Marie Humphrey, O.D.
